Leung | Coram | Cooper | Richardson

***Audit & Assurance, 1st Edition*** features a concise and contemporary presentation of auditing. The text is delivered in a cutting-edge interactive digital format designed to motivate students by taking the road blocks out of self-study.

The text is accompanied by Ernst & Young's acclaimed audit case study, Cloud 9. The aim of this case study is to expose students to the practice of auditing and the tasks they would typically perform in their first year of auditing practice.

## What problems are we helping to solve?

- Many students are coming to tutorials unprepared, which means they cannot participate effectively
- Students generally find auditing to be abstract and rigorous. As a result, students struggle to understand the core audit processes
- A significant percentage of students find it challenging to apply what they have learned
- Texts in this area, over many editions, have become extensive and verbose, containing a lot of content that is not typically taught nowadays
